- Reduction of unwanted alarms (false alarms) by classifying target objects using deep learning algorithms. This significantly reduces false alarms generated by objects other than people or vehicles. This makes finding events easier and saves hard drive capacity
- Many AI functions integrated such as face detection, intrusion detection, object counting, queues, heat map and much more
- Motorized Varifocal Lens: f = 2.8 12 mm
- WDR (Wide Dynamic Range) for extreme backlight situations
- NDAA compliant
