

INT-ADR

ADDRESSABLE ZONE EXPANSION MODULE

The module is designed for connecting addressable detectors to the control panels of **INTEGRA** and **INTEGRA Plus** families. This device replaces the CA-64 ADR module. The use of **INT-ADR** facilitates wiring, particularly where extensive systems are involved. The addressable detector bus is independent of the control panel expander bus, which makes possible the hybrid implementation of systems, combining addressable and directly connected components.

- dedicated independent addressable detector bus
- support for addressable detectors based on **CA-64 ADR-MOD** module
- capability of system expansion with up to 48 addressable zones
- ability to connect to **RS-485** bus (firmware update via the bus)

TECHNICAL DATA

POW output rating	2,5 A / 12 V DC
Environmental class according to EN50130-5	II
Maximum humidity	93±3%
Max. current consumption	35 mA
Supply voltage	12 V DC
+12 V output rating	2,5 A / 12 V DC
Standby mode current consumption	30 mA
Operating temperature range	-10 °C...+55 °C
Dimensions	80 x 57 mm
Weight	35 g
